

St. Rita High School

Miyapur, Hyderabad

Hyderabad

Dt: 19/12/2022

Dear Parent, Greetings!

Hope you are doing well.

Field trip communication.

Learning through experience has a profound impact on every individual. Educational field trips help students learn beyond the classroom. For Grades i.e., from VI to VIII, we have organised an educational field trip to an agricultural farm on 21/12/2022 Wednesday at Avancha village in between Doultabad and Narsapur, Telangana.

Benefits of a Farm Visit

Children who learn outdoors know more, understand more, feel better, behave better, work more cooperatively and are physically healthier. The benefits of a visit extend long beyond the children's time at the farms – they take their new skills and experiences back home and to school, with parents and teachers seeing positive and lasting impact on their behaviour, learning and self-esteem.

Spending time in the countryside can reduce stress and allows children to break free from behavioural challenges.

Being immersed in vibrant rural life gives children the opportunity to enjoy many new sensory experiences. The sights, sounds and smells of the farm are all new,

Immersing children in the outdoor world provides schools with the opportunity to extend their broad, rich and deep curriculum through the wide variety of technical tasks, collaborative activities, and immersive experiences.

A visit to the farms immerses children in the rich culture of our heritage, working alongside local people whose lives and narratives are connected to the land, and where the innovations of previous generations provide living laboratories in which to inspire young minds.

Things that will be covered in the trip:

1. Paddy Cultivation
2. Pulses Cultivation
3. Vegetable Cultivation
4. Cash Crops (Cotton, Sugar Cane, Fruits, Flowers etc.,)
5. Climbing Vegetables (Bottle Gourd, Bitter Gourd, Cucumber, Beans tec.,)
